

CRIS JOHNSON'S AMAZING SCHOOL ASSEMBLIES

Cris Johnson Makes Math F.U.N.!!

Cris Johnson promises that your students will get more excited about math than ever before as they learn math puzzles, games, and even math-e-magic tricks that they can do at home. They won't learn about adding, subtracting, or dividing (they get enough of that in class) but Cris guarantees that your students will understand that math is all around them and is a big part of what they do and see every day.

Here's What Past Clients Have To Say:

"We loved your assembly today! Both the students and the teachers were talking about it all day. The students were amazed by the magic tricks and the teachers loved the educational tie ins! You differentiated your presentation to effectively engage both primary and intermediate students! We can't wait to have you back!"

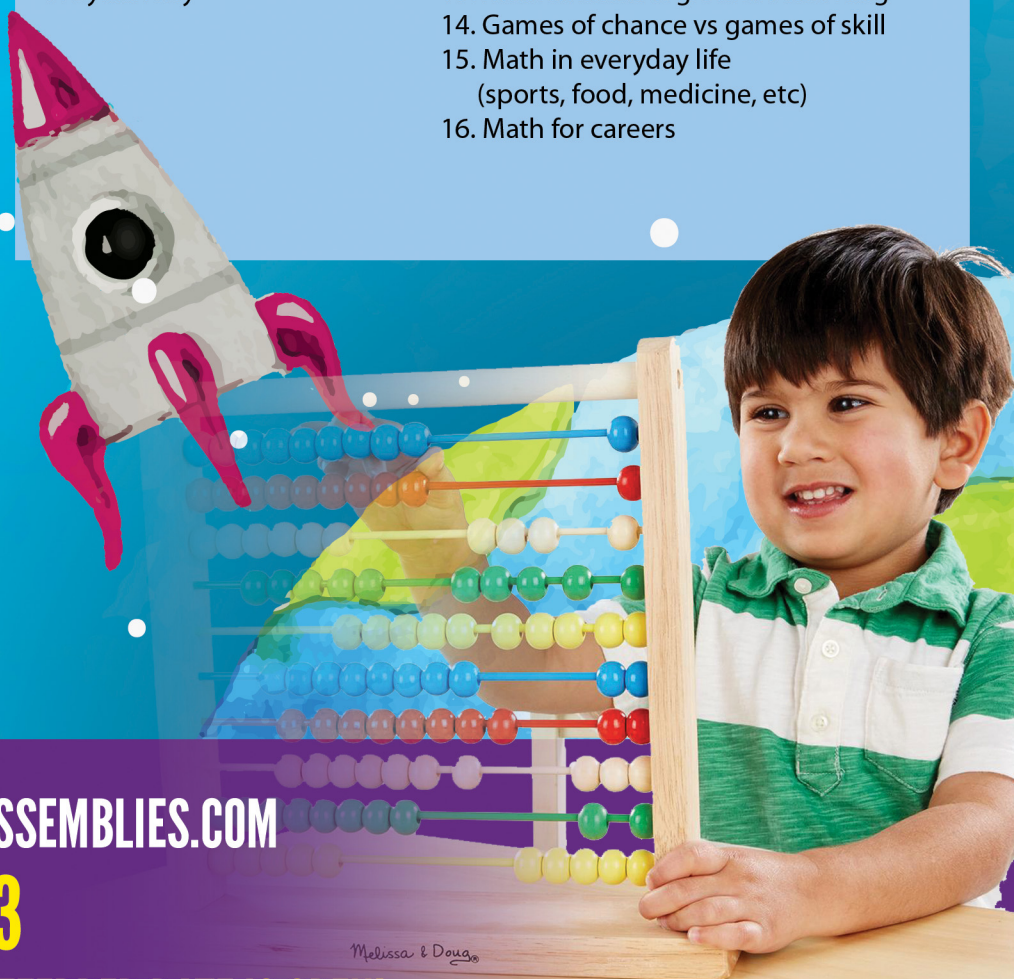

Mary Biemer, Reading Specialist
Chase Elementary School
Baltimore, MD

"We would like to thank you for visiting Archer Street School. We were engaged because of the creative ways you conveyed your messages to us. Your messages and the way you used magic was exciting!"

Mrs. Fisher and Her Fourth Grade Class
Archer Street School
Freeport, NY

Some of the concepts in the Goofy Kooky Math Show school assembly:
